

Code: 22G1

## 6.1m (20ft) long standard container

### Instant storage space

Has your business or facility run out of space, are you overstocked, undergoing a refit, or shifting premises?

Do you need to shift stock to point of sale?

Are you running or attending an event you need to move product or equipment to?

A Boxman container is the perfect solution for your short or long term storage.

### The benefits:

- Instant, flexible storage options
- Prompt delivery and pick-up
- Cost effective
- Safe, dry and vermin proof
- Lockable and tamper proof
- Durable steel construction

### About this container

The 22G1 is the most common type of 6.1m (20ft) long container used in international shipping. This container is certified for shipping and rail for five years from date of manufacture before requiring re-certification. It is maintained to a 'Food Grade' quality standard, ensuring the best possible equipment is available at all times.

### Boxman containers

This container has been specifically designed and manufactured according to Boxman Group specifications to meet our customer's high expectations. As containers are used for a one-off cargo load to move them into New Zealand some scuffs and marking of the paintwork is to be expected.

### Container features

New build Boxman containers are built to the highest industry specification. They all feature high strength, corrosion resistant steel and additional vents to prevent condensation. Polyurethane coated floors for easy cleaning and security lock-boxes are standard.

All Boxman containers are CSC plated to allow for coastal and international shipping.

| Subtype        |            |
| Shipping Grade | IIICL5     |
| Internal Grade | Food Grade |

### Boxman's new build container features

#### 1. Lock-box

The security lock-box features a covered tab to which a padlock can be fixed. The solid construction will deter even the most determined of thieves.

#### 2. Varnished floor

Most Boxman containers feature a coated polyurethane floor. This reduces maintenance and cleaning costs.

#### 3. Extra Ventilation

All Boxman new build containers are fitted with a minimum of four vents to reduce the risk of condensation and sweating.

#### 4. Higher handles

All Boxman new build containers feature higher handles. This is a great feature that will save your back, and make it much easier to get the leverage you need to open up your container.

## BOXMAN
