

Code: 25G3

6.1m (20ft) long High-Cube container with a single side door

Instant storage space

Has your business or facility run out of space, are you overstocked, undergoing a refit, or shifting premises?

Do you need to shift stock to point of sale?

Are you running or attending an event you need to move product or equipment to?

A Boxman container is the perfect solution for your short or long term storage.

The benefits:

- Instant, flexible storage options
- Prompt delivery and pick-up
- Cost effective
- Safe, dry and vermin proof
- Lockable and tamper proof
- Durable steel construction

About this container

This High-Cube 6.1m (20ft) long container has all of the robust features of the standard High-Cube box, except we've added a side door to allow for flexibility of entry and positioning on a site.

Typically it would be used for general or furniture storage where you want access to product in both ends of the container, and also features full length internal tie rails on all walls plus the roof.

With an ample 37.4m³ of space available they will easily accommodate a 3 bedroom house lot.

Container features

New build Boxman containers are built to the highest industry specification. They all feature high strength, corrosion resistant steel and additional vents to prevent condensation. Polyurethane coated floors for easy cleaning and security lock-boxes are standard.

All Boxman Group containers manufactured from 2009 onwards have a floor made from bamboo, a renewable resource, making them the most environmentally friendly containers available in the New Zealand market.

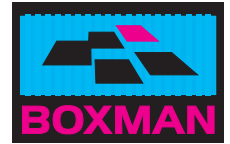

All Boxman containers are CSC plated to allow for coastal and international shipping.

Boxman's new build container features

1. Lock-box

The security lock-box features a covered tab to which a padlock can be fixed. The solid construction will deter even the most determined of thieves.

2. Varnished floor

Boxman containers feature a triple coated polyurethane floor. This reduces maintenance and cleaning costs.

3. Extra Ventilation

All Boxman new build containers are fitted with a minimum of four vents to reduce the risk of condensation and sweating.

4. Higher handles

All Boxman new build containers feature higher handles. This is a great feature that will save your back, and make it much easier to get the leverage you need to open up your container.
