3m (10ft) long cut down container – construction site shed

Instant storage space

Has your business or facility run out of space, are you overstocked, undergoing a refit, or shifting premises?

Do you need to shift stock to point of sale?

Are you running or attending an event you need to move product or equipment to?

A Boxman container could be the solution for your short or long term storage.

The benefits:

- Instant, flexible storage options
- Prompt delivery and pick-up
- Cost effective
- Safe, dry and vermin proof
- Lockable and tamper proof
- Durable steel construction

About this container

Boxman re-manufacture these containers by cutting them out of a 12.2m long container and then rebuilding the missing walls. This is done at our local branches, which allows some customisation to suit your individual requirements. For example, the container length can be varied from 2.7m to 3.5m if required, giving a storage capacity of between 14m³ to 20m³.

The 3m (10ft) long cut down container is specifically built to meet the needs of the construction industry for site sheds. They are also ideal for those who have a tight space within which to fit their storage container.

There are a range of door options, but the standard configuration is double end doors. Please speak to us about your requirements if you want something else, as there are plenty of options for customisation.

Boxman fully repaints these cut down containers inside and out, so they generally come to you in an "as new" aesthetic condition, however cut-down containers are not suitable for shipping purposes.

Boxman containers

At Boxman we believe our best attribute is providing value for money in matching our customers with the container that best suits their overall needs, taking into account budget, timing and any specific requirements.

We strive to purchase the highest quality containers we can for our stock. As a

consequence, since we began the business in 1990, Boxman has built a reputation for supplying the highest quality second hand container equipment available in the market.

Container features

Boxman's cut-down containers come with several unique features:

Firstly, all the steel panels that we add are high quality, New Zealand made, new steel.

We add a secure lock-box and forklift pockets. Top lifting loops can also be added, and other custom modifications are possible if required.

Single door units come with an easy to operate locking mechanism.

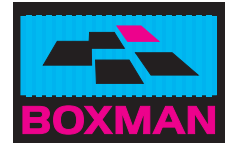

The containers are lightweight and easily handled on-site.
